

# In the Garden - July 2007 Page 3

By Garry Sankowsky

*Rockinghamia angustifolia*

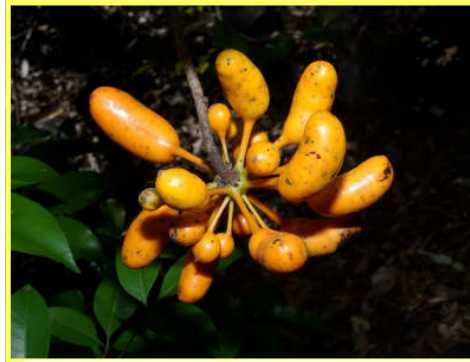

*Syzygium monimioides*

*Syzygium rubrimolle*

*Terminalia catappa*

*Uvaria concava*

*Wilkiea* sp. Lockerbie

*Zanthoxylum ovalifolium*

*Neolitsea dealbata*

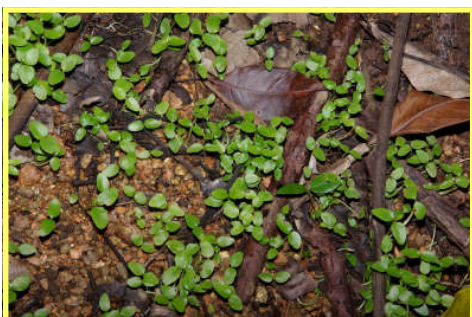

*Sarcotoechia serrata*

## Seedlings by the millions!

If a rainforest garden is in good balance there should be large volumes of seedlings produced each year, just like in a natural rainforest.

These four shots show just a few of the huge number of seedlings that come up each year in our rainforest garden.

*Schefflera actinophylla*

*Argyrodendron* sp. Whyanbeel
